Скóлько éто стóит?	how much does it cost?
Вóзраст	age
Цíфра	number/digit
Плюс	plus
Мíнус	minus
Равнó	equals

Section 2

AGE CONSTRUCTION

The form “год” used for numbers such as 1 and any number that ends in 1 is in **Nominative case**.

The form “гóда” used for numbers such as 2, 3, 4 and any number that ends in 2, 3, 4 is in **Genitive case in singular**.

The form “лет” used for all the other numbers (5, 6, 7, 8, 9, 0 including teen numbers) is in **Genitive case in plural**.

The same principle is used in other common constructions which we will study in the next lecture such as telling time or talking about prices of items in shops.
